AcryLock™

GAME CHANGING BLOCKER,
SEALER AND PRIMER.

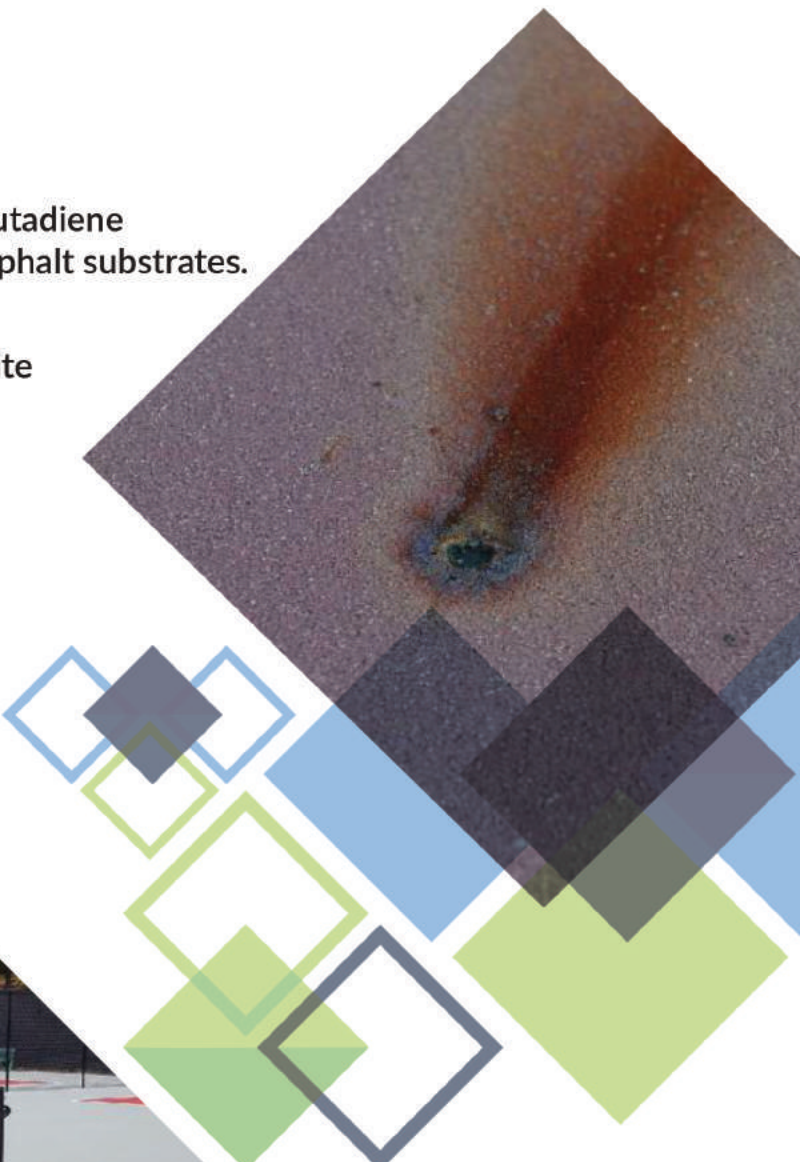

AcryLock™ is a specifically engineered Styrene-Butadiene latex-based primer and sealer for concrete and asphalt substrates.

AcryLock prevents the leeching of concrete salts (efflorescence) and asphalt impurities such as pyrite into the following layers of paint.

Use on new or resurfacing projects for active defense against future imperfections.

- Ready-to-use
- No mixing or blending needed
- Blocks rust spots
- Stops efflorescence
- Significant MVT reduction

AcryLock is best applied directly to the top of asphalt/concrete or over-aged paint on asphalt.

Can be applied with varying sizes of rollers, spray or squeegee.
